Monarch Nucleic Acid Purification Kits are optimized for maximum performance and minimal environmental impact. Kits are available for total RNA purification, plasmid miniprep, gel extraction, and DNA & RNA cleanup. For maximum convenience and value, columns and buffers are also available separately. We would like to show you a description here but the site won't allow us. Flow Cytometry Service Center

Parent Facility/Center: Center ...1. The need for subcutaneous administration. Since the development of the first peptide drug, insulin, the advances in biotechnology have led to the emergence of various types of peptide and protein-based drugs, such as monoclonal antibodies (mAbs) and fusion proteins [1, 2]. Currently, the number of mAbs approved and under preclinical and clinical studies is exponentially growing in a large ...
