

Download Hitachi Preirus Service Manual

Hitachi Healthcare Americas offers training programs aimed at the biomedical engineers who will be supporting the Hitachi Ultrasound systems in their hospital or facility. The objective of these training seminars is to provide you with a basic theory of operation and hands on repair skills. In addition, Hitachi Healthcare Americas will also provide every trained biomedGastro/EUS CLEARLY DEFINED. Hitachi's EUS suits a variety of applications, ranging from oesophageal or gastric cancer staging to endoscopic interventional procedures and therapeutic applications. Knowledge of normal endoscopic ultrasound (EUS) anatomy is the basis for orientation in EUS. Therefore, training in important anatomical landmarks is mandatory for each endosonographer.
